I am looking for a Backend Developer position where I can leverage my expertise to contribute to innovative software solutions.

Skills

CORE TECHNOLOGIES

C++
SQL
Java
Springboot
Node JS
Express JS
React JS
Mongo DB
Springboot
Data Structures And Algorithm
Amazon Web Services

INDUSTRY KNOWLEDGE

Git
Debugging
JIRA

Education

Vivekananda Institute of Professional Studies	2024 to 2026
MCA	
Institute of Information Technology & Management	2021 to 2024
BCA	

Internships

CDAC

Application Developer — July 2023 to Sept. 2023

- Leveraged MERN, and SQL Server technologies to engineer and deploy the system, meeting project deadlines and quality standards.

Summer Sunset Festival - Clique Events

Technical Head — Mar. 2022 to Aug. 2022

- Orchestrated the planning, coordination, and execution of the Summer Senset event, resulting in a 25% increase in attendance and a 40% boost in revenue, enhancing the event experience for over 1000 attendees.

Projects

TaskSwift — Apr. 2023 to Jan. 2024

- Integrated external tools for enhanced lead generation, logging, analytics, and data consolidation, boosting lead conversion by 50%.
- Automated bulk features for efficient schedule management and follow-up, reducing manual effort by 70%.
- Architected a dynamic scale-out solution for parallel resource deployment and concurrent request distribution, improving system performance by 10%.
- Tech Stack: Backend: MongoDB, Express.js, Node.js Frontend: React.

Homely — Oct. 2022 to Dec. 2022

- Implemented a user-friendly recipe browsing system, reducing search time by 30% with accurate ingredient quantities.
- Developed dynamic grocery stock management, enhancing inventory accuracy by 65% through automatic stock reduction upon dish preparation.
- Tech Stack: Java - React, Bootstrap, MySQL

Email Scheduler — June 2024 to Aug. 2024

- Developed an efficient email scheduling system, automating the sending of bulk emails at specified times with different formats and attachments.
- Developed a user-friendly interface for managing and scheduling emails.
- Tech Stack: React, Node.js, Express, AWS.
